At the national level ...

The PANACEA RI scheme

An **integrated Research Infrastructure (RI)** for specialized atmospheric observations is presently lacking in Greece.

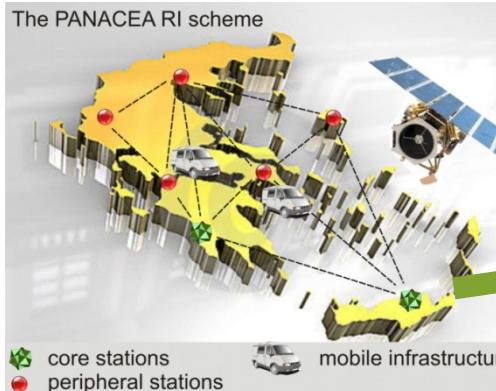

PANACEA will fill this observational gap by developing a **coordinated system** for monitoring of atmospheric composition, solar radiation variations, climate change and related natural hazards in Greece.

... through **merging, enhancing, and coordinating** all existing Greek ground-based stations and networks (e.g., in-situ gas and aerosol, LIDAR and AERONET stations, RADARs and solar radiation networks), essential to achieve excellence in research and innovation.

Vision

Mandate and Vision

GGO, as the focal point of GEO activities in Greece, addresses the need for a permanent coordination mechanism of GEOSS activities at the national level, at the same time building interfaces with GEO and the Greek State. Its main vision is to act as a springboard for the implementation of GEOSS in Greece and promote collaboration within the country but also with neighboring countries with proven capacity in the field.

GEO-CRADLE

Coordinating and integRating state-of-the-art Earth Observation Activities in the regions of North Africa, Middle East, and Balkans and Developing Links with GEO related initiatives towards GEOSS

The current proposal is addressing the H2020 Work Programme “12. Climate action, environment, resource efficiency and raw materials” and more specifically the call “SC5-18b: Integrating North African, Middle East and Balkan Earth Observation capacities in GEOSS”.

GEO-CRADLE

The overarching objective of the GEO-CRADLE project is to create a multi-regional (Balkans, N. Africa and Middle East) coordination network, supporting the effective integration of EO capacities, providing the interface for the engagement of the complete ecosystem of EO stakeholders, promoting the uptake of EO services and data in response to regional needs and, finally, contributing to the implementation of GEOSS and Copernicus in the RoI.

At the regional level ...

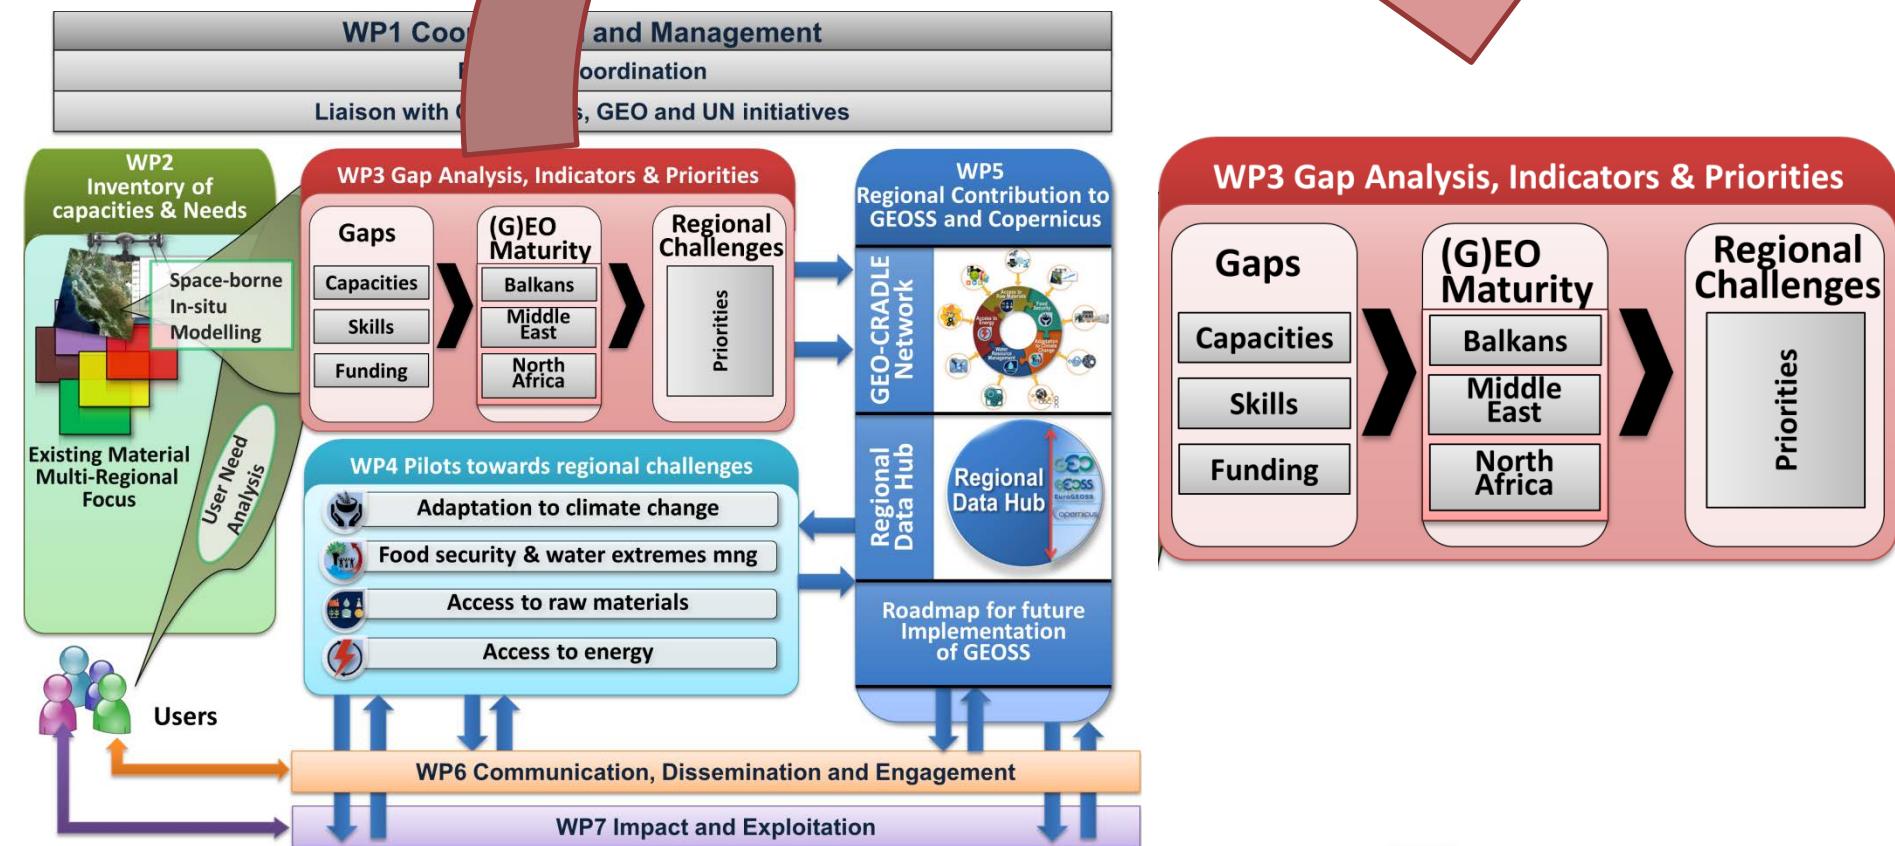

GEO-CRADLE

- Collection, homogenisation, archiving and integration of ground-, air- and space-based EO data, accessible through the GEO-CRADLE Regional Data Hub
- Provision of timely and accurate services related to atmospheric hazard forecasting and climate projections (e.g. desert dust, fire smoke, volcanic ash, air quality extremes, weather extremes, heat waves).
- Assessment of the regional climate change impacts based on region-optimised projections and establishment of a climate data hub, to support decision makers on mitigation and adaptation policies.

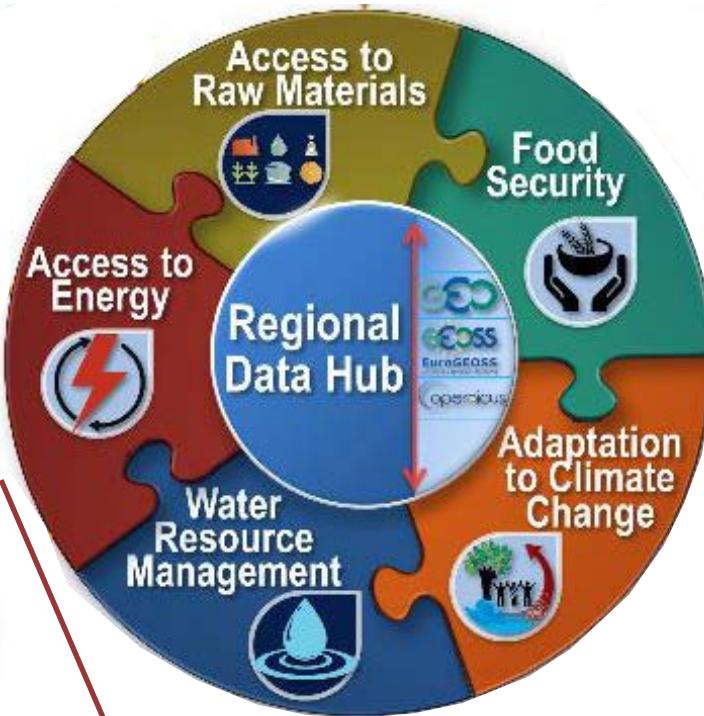

At the regional level ...

GEO-CRADLE

- **Space-borne:** NOA's Sentinel Data Hub, NOA and TUBITAK X/L band antennas for real-time EO satellite missions acquisitions, NOA EUMETSAT DVB2 acquisition antenna
- **Airborne:** Data from airborne campaigns performed in the region (e.g. FENIX-SPECIM, CHARADMexp, ACEMED, Aegean Game)
- **In-situ:** Sensors operating in the framework of AERONET, ACTRIS, EARLINET, ICOS, GAW/WMO, ENSEMBLES, CORDEX, E-OBS, PANACEA.
- **Atmospheric and Climate Models:** MACC, WRF, NMME/DREAM, FLEXPART, HYSPLIT, RegCM4, RAMS.

At the regional level ...

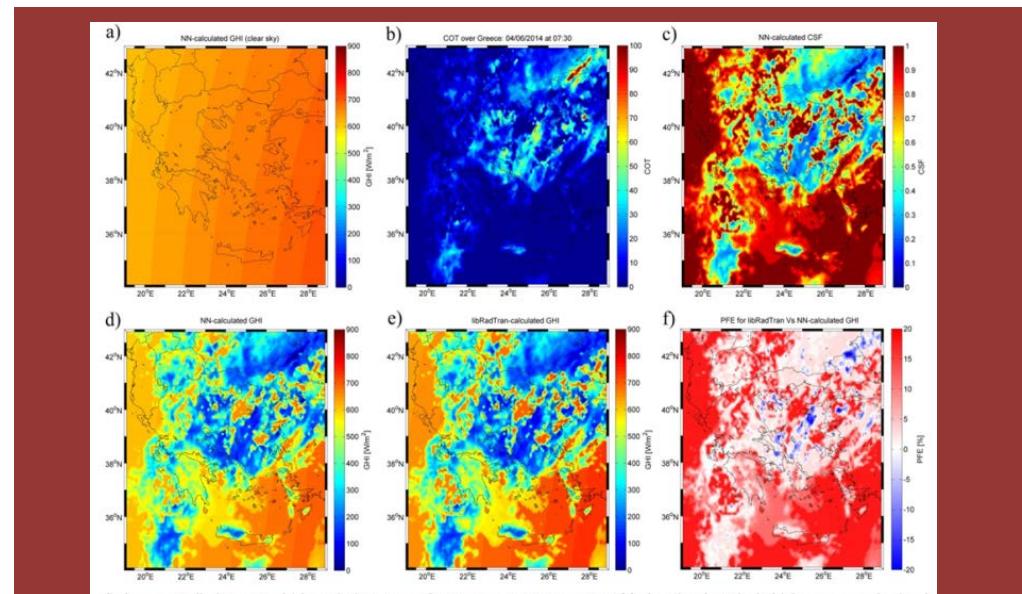

GEO-CRADLE

- **Solar Energy Nowcasting SystEm (SENSE) pilot:** provision of an operational, satellite-driven, real time system for solar energy now-cast.
- **Satellite missions:** MODIS Aqua & Terra, CALIPSO, MSG3-SEVIRI, EarthCARE, Sentinel-3/4/5p
- **In-situ networks and European Infrastructures:** AERONET, CloudNet, GAW, EARLINET
- **Atmospheric models:** libRadtran radiative transfer model (RTM), domestic (NOA) neural network (NN) model of the spectral irradiance from cloud and aerosol inputs, DREAM, GOCART

At the regional level ...

GEO-CRADLE

Sub-call

H2020-SC5-2014-2015

Topic

SC5-15-2015: Strengthening the European Research Area in the domain of Earth Observation

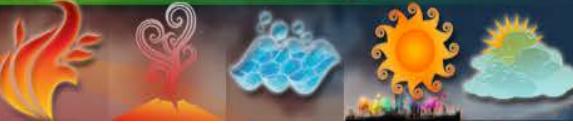

At the European level ...

ERA-PLANET

THE EUROPEAN NETWORK FOR OBSERVING OUR CHANGING PLANET

The overarching goal of ERA-PLANET is to strengthen the European Research Area in the domain of Earth Observation in coherence with the European participation to Group on Earth Observation (GEO) and Copernicus.

The expected impact is to strengthen the European leadership within the forthcoming GEO 2015-2025 Work Plan. ERA-PLANET will reinforce the interface with user communities, whose needs the Global Earth Observation System of Systems (GEOSS) intends to address.

At the European level ...

ERA-PLANET

THE EUROPEAN NETWORK FOR OBSERVING OUR CHANGING PLANET

ERA-PLANET will provide advanced decision support tools and technologies aimed to better monitor our global environment and share the information and knowledge available in different domain of Earth Observation.

It will provide more accurate, comprehensive and authoritative information to policy and decision-makers in key societal benefit areas.

ERA-PLANET

THE EUROPEAN NETWORK FOR OBSERVING OUR CHANGING PLANET

Strand 1 - Smart cities and resilient societies

(focus on: urban growth, air quality, natural and manmade disasters, health and contaminated sites)

Strand 2 - Resource efficiency and environmental management

(focus on: water, energy, biodiversity and food security)

Strand 3 - Global change and Environmental treaties

(focus on: global observing systems for toxic and persistent pollutants, harmonization of monitoring systems, coupled atmosphere-ocean-terrestrial models validation, evaluation of ecosystem response to regional/global emission changes, support to policy implementation)

Strand 4 - Polar areas and natural resources

(focus on: monitoring and assessment of ecosystems quality in Arctic and Antarctic)
